

## 1965 Gottlieb "Dodge City"

I have owned this pinball for about 25 years. It was refurbished by a friend soon after I purchased it. At that time it only needed some minor electrical work. It has not been played in over 20 years. It was working up until the time I was forced to move it to the garage where it sat for several years before it was touched again. After that amount of time it would barely play and needed a little prodding to get it to work. This is an excellent machine for someone to restore. This machine is intact except for the '10 WHEN LIT' cover on one of the bumpers. The legs have surface rust, parts of the cabinet need repainting and I suppose all of the rubber parts will need to be replaced. The paint is peeling on part of the scoring glass and there is slight 'play' wear on the playing surface. Otherwise, this machine is easily restorable.

Scoring glass.

Dancing cowboy needs a little work on his left leg.

Close-up of paint peeling on scoring surface.

The only missing piece (that I know of).

Inside electrics.

Underneath playing surface.

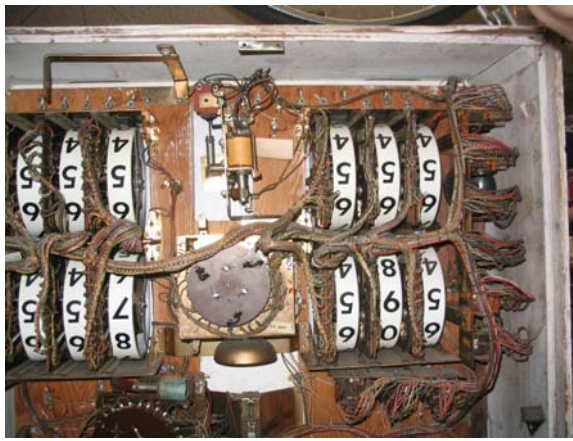

Most of rubber needs to be replaced. I suppose this is typical wear.

Playing surface showing wear from play.

Behind scoring glass.

Coin door shows signs of rust, needs paint.

Includes the schematic.
